

# Installation Instructions

## 5423203 3-to-2 Tail Light Convertor

### Install:

**1.** Locate the truck or towing vehicle's left & right rear turn signal wires & the stop light wire coming from the brake switch.

**2.** Attach the adapter unit to a convenient location on the rear of the truck via the adhesive tape and connect the three input wires as follows:

- A - Yellow wire to the left turn signal
- B - Green wire to the right turn signal
- C - Red wire to the (cold) side of the brake switch

### NOTE:

Clean area in which the adapter unit will be placed with alcohol prior to adhering.

**3.** Connect the output wires of the adapter as follows:  
A - Yellow wire to the left stop & turn signal of the trailer  
B - Green wire to the right stop & turn signal of the trailer

**4.** Install wires (not provided) between both towing vehicle & trailer tail lights for night time operation.

### NOTE:

Connect trailer tail light wires directly to truck tail light wire. Connect trailer ground wires directly to car chassis ground or wire.

### Test Procedure:

To insure proper operation of the adapter unit when not connected to the vehicle, please complete the following procedure.

**1.** Connect the input red wire to the battery (positive) or 12 volts.

**2.** Connect the input green & yellow wires to battery (negative) or ground.

**3.** With a test lamp or voltmeter connect between the output green wire & ground. The test lamp should light or the meter should indicate 10V or greater.

**4.** Repeat step 3 between the output yellow wire & ground. The test lamps should light or the meter should indicate 10V or greater.

**5.** If the above tests are successful, then the unit is operational.

### NOTE:

See wiring diagram on reverse.
